"Just wait a minute and I'll come out and let you down," he remarked as he went back after a pair of trousers. But there seemed to be no other engagement, for before Mr. Granger could renew his invitation, the marauder had made himself scarce. Mr. Granger is confident that there was a man on the roof, but the officers are inclined to call it cats.

—The date for the grand concert to be given by Mr. Wm. Sherwood of New York, has been fixed for Saturday evening, April 22d. There is no doubt that he is one of the greatest of the pianists of the present day and every one should make an effort to hear him as such an opportunity to hear an artist comes but rarely to Janesville people. The American Art Journal says of a recent concert at which he played: "Then came one of the soloists of the evening, Mr. Wm. H. Sherwood, the pianist. With Franz Schubert's grand fantasia 'The Wanderer' arranged by Liszt and in Weber's 'Polonaise Brillante' it is not too much to say he established his reputation. Mr. Sherwood was recalled after the 'Polonaise' and forced to repeat it entirely."

AMUSEMENTS.

MICHAEL STROGOFF.

The New York Herald says: As brought out by the Andrews Company it is both a majestic and massive representation. Its appointments are grand and picturesque in chromatic detail, and there is a peculiar fascination about the successive scenic accompaniments that defy imitation. It is an imposing spectacle of rude barbaric splendor, attended with the delicate coloring of Asiatic imagination and the surpassing richness of Mohammedan fancy. It is produced without any abatement of its original charms, and preserves all the fascination which characterized it throughout the varied romantic incidents of its scenic contrivance.

A Chicago paper says: Manager Andrews is, in reality, bringing to our doors, the same company, the same scenery, and the same spectacular effects, which were seen at Booth's theatre.

A PRICE OF PIE.

"That fellow, Charley Gilday, is about the biggest fool I ever met him when he stage, I mean. I have met him when he wasn't on duty and then he's about as smart and clever a whop as you can start up." Thus spoke a traveling man to a reporter as the two sat in a comfortable seat in the theatre last night witnessing, and listening to, the drilleins of "A Piece of Pie."

Gilday is immense as a comedian, and it given a free rein, would rush right up to the wire with the leading comedians of the day. The farce now being presented at McDonald's, is crowded with laughable hits, droll turns and sparkling songs and dances. It is worthy of full houses every night.—Montgomery Capital.

THE QUESTION SETTLED.

Dr. DeWolf and other scientists have discovered a new germ which is a decided appetite for lead pipe.—Ex.

This is enough. While the city fathers have been agitating the water works question upon every street corner, the city fathers have decided the matter for ever and aye. Not one drop of water for domestic purposes will we ever use, transmitted by pipes which are the cozy homes of that dreadful newly discovered germ. It is sufficiently harrowing to distracted nerves, to find indigo in our white sugar, glucose and a small private source, similar to the louse and it is not in our brown sugar, the elements of streptococcus in coffee, and typhoid bacteria in our milk, but it is more than delicate nerves can endure to find out that the water, each quart of which is a lively aquarium of poisonous polylogues, and mysterious unknown zymotic germs. The city water men will lay their plans and their water pipes in vain. The question of their practical usefulness is already irrevocably decided by the power behind the throne. By all means have the works constructed by a private corporation, which will immediately mortgage its franchise to outside parties for all it is worth, and the whole concern will soon be gobbled up, including the dreadful devastating De Wolf germ, and all other incipient ailments.

SUNDAY SCHOOL WORKERS.

The Nineteenth Annual Meeting of the Rock County Society.

An Interesting Session at Beloit.

The Seventh Day Baptist society of Milton have one of the prettiest little churches in the west, presided over by Rev. E. M. Dunn, and it was there we met to take counsel together in the great interests of the Sunday school work.

The devotional exercises with which the convention opened, at two o'clock Tuesday afternoon, were led by Mr. Dunn, and were filled with interest.

The address of welcome was given in a kind and hearty manner and pleasantly responded to by President J. T. Wright. He referred to the sad fact that the word of God is being crowded out of our public schools, and said we must now do harder work for Christ in our Sunday schools.

The evening session began with a half hour meeting for devotions led by Rev. Geo. Smith, of Milton, after which we listened with much pleasure to an address by Prof. J. J. Blaisdell, of Beloit, on "The Bible in the Sunday School." Among other things, he said: "It has seemed to us a wonderful provision of Providence, that with all the hallored influences of the Sabbath day, we are permitted to gather, in all the stillness of the house of God, with all these teachers. That such an opportunity should be given to study His word is a great privilege; that the church is permitted to gather together on the Sabbath day to hear God's word, is an inheritance to God's people that cannot be estimated; and it is worth our while to come together to inquire what this privilege is, that we enjoy. The object of the Sabbath school is to promote the knowledge of the bible. The more we study it, the more we are impressed with the fact that all things in the bible are a unity. The teaching in the Sabbath school is the Word, by those who are capable of doing it, to teach Christ, the Saviour. Those teachers are most successful who have gone straight to the center, and given the facts that lie right near the great central truths of the gospel, about Jesus Christ. The bible is not only a wonderful, but an unparalleled book, just exactly adapted to the use of Christ's people. Every word in the bible is so there because God meant it should be. The book is so planned as to be the most effective education of God's people. In regard to the staple truths of the bible, the bible is a book of knowledge, that cannot be found on its pages; and in view of the fact that the diligent student the bible will explain itself, the 'helps' are attractive and out of place.
